Mantu Kumar

Skills

Languages: JavaScript, TypeScript, Swift, Java

Technologies: React Native, Expo, React, Next.js, Redux, Zustand, React Query, Jest, Firebase, GitHub, CI/CD

Tools: Xcode, Android Studio, VSCode, Cursor, Postman, Antigravity

Experience

Sr. React Native Developer & Team Lead, iTechnolabs Pvt. Ltd. – Mohali, Punjab Aug 2022 – present

- Led and mentored a team of 12+ developers, enforcing TypeScript standards that eliminated runtime errors and improved team productivity by 25%.
- Engineered a high-performance POS system (React Native + Next.js), boosting operational efficiency by 30% and user satisfaction by 20%.
- Accelerated app performance by 20% through the implementation of a new bridgeless architecture and reduced project setup time by 30% by migrating to Expo.
- Managed end-to-end client communication and delivery for key accounts, achieving a 95% client satisfaction rate through transparent reporting.
- Resolved critical Google Maps integration bugs, reducing client API costs by 40% and preventing comprehensive billing leakages.

Sr. React Native Developer, Suffescom Solutions – Mohali, Punjab Oct 2021 – Aug 2022

- Led and mentored a team of 7 developers, establishing React Native coding standards that improved collaboration and code quality.
- Engineered an Android native module enabling background tasks with 99.9% reliability.
- Developed a food delivery app serving 1,000+ users, implementing real-time tracking and payments via WebSockets and Maps.
- Enhanced app security by resolving subscription loopholes, ensuring 100% compliance with single-user policies.

Junior iOS Developer & React Native Developer, Immanent Solutions – Mohali, Punjab Sept 2018 – Oct 2021

- Engineered 4 scalable mobile apps for event, education, social, and crypto sectors, serving 1,000+ users via iOS and React Native.
- Achieved 100% security compliance by implementing HMAC-based API authentication to mitigate unauthorized access risks.
- Reduced development time by 40% by migrating native iOS codebases to React Native.

Projects

Focusbear - ADHD Jan 2023 – present

Productivity app helping users block distractions and build healthy habits.

- Engineered native modules for Android (distraction-blocking dialog) and iOS (Screen Time API), achieving a 50% reduction in user distractions.
- Formulated a scheduled app-blocking feature, improving user focus consistency by 40% during routine intervals.
- Deployed a log file system to track errors and crashes, improving error resolution efficiency by 50%.
- Introduced offline API caching, ensuring 99.9% uptime and an uninterrupted user experience.

JOBR - POS

Point of Sale system for service management.

- Designed a custom calendar module for service scheduling, improving appointment management efficiency by 40%.
- Integrated Apple's Tap to Pay for secure transactions, increasing payment versatility by 50%.
- Created a wallet module for JOBR coins, boosting in-app transaction engagement and user retention by 30%.
- Built a web app using Next.js, ensuring consistent cross-platform functionality and improving UX by 40%.

Mealed - Food Ordering

On-demand food ordering and delivery platform.

- Integrated React Native Maps for real-time driver tracking, enhancing order capabilities by 50%.
- Added Stripe for card payments and developed a wallet module, improving transaction convenience by 40%.
- Implemented real-time push notifications using Notifee, boosting user engagement for order updates by 25%.
- Incorporated Agora for in-app calling, improving communication efficiency by 35%.

Ride2Duty

Corporate mobility platform streamlining employee commutes via automated scheduling.

- Architected a corporate commute platform using Expo, enabling automated scheduling and recurring ride management for seamless employee transportation.
- Engineered a resilient background location service that bypasses Android battery optimizations (Doze mode), ensuring 100% real-time tracking reliability.
- Developed stutter-free map animations by implementing custom coordinate interpolation for driver markers, ensuring smooth real-time location updates.
- Designed critical permission handling flows to secure 'Always Allow' access, resolving background execution failures across diverse Android OEM devices.
